Industrial-grade LoRaWAN asset tracker with dual connectivity, SOS alert, rugged IP67 design, and flexible installation options.

Excessive heat inside safety helmets often causes discomfort, fatigue, dehydration, and reduced efficiency. With this real-world problem in mind, I designed and developed a ...

What's even more impressive is that this hard hat's fan is powered by a small built-in solar panel. So, you can maximize the heat of the sun by ...

Efficient Solar Power Generation: Equipped with solar panels, the safety helmet collects and converts solar energy into electrical energy, ensuring continuous operation of the built in fan.

- The safety helmet with solar fan is designed to operate easily, utilizing solar energy for power accessories.
- With its impact-resistant construction, this safety helmet offers reliable ...

The safety helmet utilizing the solar power generation to drive the fan to dissipate the heat comprises a safety helmet main body, a small electric fan, a solar cell panel, a...

This multifunctional helmet not only ensures rider safety but also demonstrates an effective approach to self-powered safety systems, utilizing renewable energy to enhance the reliability ...

Solar-powered smart helmets can deliver enhanced impact protection along with lights, navigation, connectivity and more - all without the need for ...

Design and Development of an Energy Harvesting-Based Self-Powered Smart Helmet Using Solar, Thermal, and Wind Energy with Accident Airbag Deployment System for Enhanced Road ...
