Wattlab has installed a PV system capable of delivering up to 35 kW to a cargo ship's high-voltage propulsion system, allowing it to temporarily ...

New Dutch cargo ship is the first of its kind to sport a massive but flexible solar power system for its hotel load, in addition to hybrid-electric ...

Photovoltaics enhance marine sustainability, leading to environmentally friendly shipping. Economic evaluations reveal significant cost saving and ecological advantages of PV.

Dutch solar innovator Wattlab and German inland shipping giant HGK Shipping have teamed up to launch the world's first hybrid solar-powered inland ...

This paper will review several studies and applications of solar energy as part of ship power system, and analyze the contributions in supporting reduction of carbon emissions.

The Maritime Technology Cooperation Centre (MTCC) Pacific supported the trial of marine solar power systems on two ships to power electricity needs, especially when in port. This resulted in overall ...

The energy harvested by the marine solar panel array or string of photovoltaic (PV) panels can power a DC load, provide backup or emergency ...

Solar on ships in 2026 is finally getting less hand-wavy because there are now real installs and trials that show where PV helps and where it does not. The pattern that looks legitimate is solar ...

Explore the world of solar-powered marine vessels, where innovative technology meets sustainability. This blog post delves into the benefits of ...
