-----

This breakthrough station uses multiple sensors for comparison to one another, to gather data and diagnose soiling losses with increased accuracy regardless of location, tilt-angle, or installation style. ...

This study focuses on the modelling of functioning data from a 32 kWe dish-Stirling solar plant installed at a facility test site on the University of ...

The world's largest solar farm, in the desert in northwestern Xinjiang, is now connected to China's grid. The 3.5-gigawatt (GW), 33,000-acre solar ...

Thousands of solar panels stretch across the Nileke landscape like a glistening sea, while sheep graze beneath them -- their bells echoing through ...

As more solar PV plants optimize their operations, they are using dedicated soiling measurement sensors and stations to monitor soiling losses. ...

A Chinese state-owned company said on Monday it had connected the world's biggest solar plant to the grid in northwestern Xinjiang.

China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang.

China launches the world's largest solar farm in Xinjiang, covering an area roughly the size of New York City. The 5GW complex can meet the ...

NLR scientists and engineers have generated a map that highlights soiling parameters of fielded photovoltaic panels at 255 locations--either soiling stations or photovoltaic sites--across the ...
