The US installed a record 57.6 GWh of battery energy storage capacity in 2025, up 30% from the previous record set in 2024 despite federal actions targeting clean energy, the Solar Energy ...

As of 2025, lithium-ion battery cell manufacturing for stationary electricity storage applications has risen to over 21 GWh according to SEIA's Solar and Storage Supply Chain ...

The U.S. energy storage industry has entered a "new phase of sustained, high-volume deployment," according to the inaugural Energy Storage Market Outlook Q1 2026 released by the ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Standalone energy storage made up nearly 30 GWh of the new capacity added in 2025, while systems paired with solar accounted for 20 GWh. Residential storage grew substantially, ...

27.1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. 55% of all new capacity came from utility-scale systems, ...

Standalone storage made up nearly 30 GWh of new capacity added in 2025, while storage paired with solar accounted for 20 GWh. The residential energy storage sector added 3.1 GWh in ...

The U.S. energy storage industry installed 57.6 GWh of new capacity in 2025, the largest single year of new battery capacity additions on record. Energy storage installations grew 30% from ...
