OverviewHigh-temperature collectorsHistoryLow-temperature heating and coolingHeat storage for space heatingMedium-temperature collectorsHeat collection and exchangeHeat storage for electric base loadsWhere temperatures below about 95 °C (200 °F) are sufficient, as for space heating, flat-plate collectors of the nonconcentrating type are generally used. Because of the relatively high heat losses through the glazing, flat plate collectors will not reach temperatures much above 200 °C (400 °F) even when the heat transfer fluid is stagnant. Such temperatures are too low for efficient conversion to electricity.

The Evacuated Tube Collector from SunMaxx Solar is the perfect choice for both the do-it-yourself customer and the professional installer. This solar hot water heating system is an all-in ...
