This article defines the concept of a Defense Energy Architecture that may guide the construction of microgrid systems to ...

The researchers conducted a system-level study in-volving facility fossil energy requirements, carbon dioxide emissions, percentage of land necessary to meet the fossil energy requirement, cost of solar ...

Enter the AI-optimized energy storage system with IP65 rating, the superhero cape your charging infrastructure never knew it needed. These smart systems aren't just battery boxes - they're like ...

The Department of Defense (DoD) announced at Fort Liberty today, a first-of-its-kind partnership with Duke Energy to power five military installations ...

By working closely with the U.S. Army Rapid Equipping Force, the Solar Stik Team has developed a 7 kW Alternative Energy System specifically configured to ...

This review synthesized current research on integrating solar energy into Unmanned Aerial Vehicles (UAVs) for defense and military applications, examining photovoltaic technologies, structural ...

The Bhargavastra counter-drone system was developed by the Solar Defence and Aerospace Limited, a subsidiary of the Solar Group in response to the increasing dangers that the Indian Army faces from weaponized drones and loitering munitions. The project began after analyzing the Russian invasion of Ukraine, which involved the use of loitering munition and swarm drones, and the Nagorno-Karabakh conflict between Azerbaijan and Armenia. The Bhargavastra counter-drone system was developed witho...

Renewable energy generation and storage was one of 14 critical technology areas identified by Undersecretary of Defense for Research and ...

We used a Systems Engineering approach to compare existing portable energy systems and to specifically

Solar energy five-defense system

design a portable solar energy system for use tailored for a deployed military/combat unit.
