We are ready for solar energy, all we need is to use it well! Renewable Energy Hub Company (Rehubco) was established in 2017 in Hargeisa Somaliland, and it has branches in Somalia, Ethiopia, and Djibouti.

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 10 locations across Somalia. This analysis provides insights into ...

The Hargeisa Energy Storage Key Project is setting a benchmark for integrating solar and wind energy into the national grid. This article explores its technical innovations, economic benefits, and role in ...

Nine pioneering businesses have been selected by the IKEA ...

Properly understanding solar irradiance can help accurately quantify the solar energy resource and guide sustainable development projects, particularly where measured solar data are ...

Compile and provide, with the collaboration of the Ministries of Education and Energy all the information required for the implementation of the Solar Photovoltaic and Energy Storage Solutions.

Summary: Hargeisa's energy storage projects are transforming Somaliland's renewable energy landscape. This article explores their applications in solar integration, grid stabilization, and ...

The objective of the project HA-G1048 is to maximize the use of the energy produced by the 8-MWp solar photovoltaic plant (SPP) to further reduce the use of thermal power, by implementing a Battery ...

This session focused deeply on integrating solar power into modern energy systems, highlighting existing challenges and exploring innovative solutions.
