The world's largest solar-plus-storage project has made a critical achievement that confirms system readiness and safe connection to the Luzon grid. Meralco PowerGen Corporation ...

The MTerra Solar project in the Philippines has reached a major milestone with the successful initial grid synchronization and energization of its first phase. Located in Nueva Ecija, this ...

Tetchi Capellan, a pioneer of solar PV in the Philippines, discusses the country's crucial turning point in its adoption of energy storage.

Learn about market trends, government incentives, and how solar-plus-storage solutions are reshaping energy security. Discover why this tropical nation is a hotspot for renewable energy investments.

Progress depends on integrating storage from the start, using digital tools to guide early decisions, streamlining permitting for hybrid land use and leveraging local partners and adaptive ...

The Department of Energy (DOE) has introduced a new rule that makes energy storage compulsory for large renewable energy projects in the Philippines. The move is aimed at improving ...

Department of Energy (DOE) order sets out new rules for mandatory energy storage, including a minimum capacity of at least 20% of the generating plant's installed capacity. DOE also ...

From ESS News Developers building intermittent renewable energy plants in the Philippines with 10 MW or greater capacity will need to install energy storage systems (ESS) ...

Learn about energy storage solutions in the Philippines. Understand battery types, sizing, costs, and maintenance for reliable solar energy day and ...
