Use WeatherPower graphics to show daily wind and solar electricity generation based on weather of the day and installed capacity in your area.

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Search for a city, state, or zip code to see solar potential and impact across entire geographic areas. We currently have solar data for portions of 50 states and ...

Estimates the energy production of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to easily develop ...

This calculator estimates the plant and grid availability of your solar power system by identifying downtime relative to available solar radiation during the calculation period, helping to improve overall ...

Discover how sunlight availability, peak sun hours, location, weather & tilt affect your solar panel's daily energy output. Learn to optimise it.

The examination of how to compute the availability of solar power plants reveals various intricate dynamics influencing their operational efficiency ...

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

In the context of solar PV systems, availability is typically categorized into technical availability and operational availability, and each metric can be calculated for reports as a time ...
