---

Lawrence Berkeley National Laboratory (Berkeley Lab) estimates hourly project-level generation data for utility-scale solar projects in the seven organized wholesale markets and 18 additional Balancing Areas.

The table contains data on solar power generation, including DC power, AC power, daily yield, and total yield. This data can be used to analyze the efficiency and performance of the solar plant, track ...

Managing solar energy projects effectively requires precise monitoring and actionable insights. The Solar Energy KPI Dashboard in Excel is a dynamic and ...

Today, NERC's GADS maintains operating information on conventional generating units, wind plants, and solar plants. Through GADS, NERC collects information about the performance of electric ...

Monitor solar power output and efficiency with this dashboard. Analyze trends, optimize performance, and make data-driven decisions effortlessly.

Estimated small scale solar photovoltaic generation and small scale solar photovoltaic capacity are based on data from Form EIA-861M, Form EIA-861 and from estimation methods ...

Track solar energy performance with the Solar Energy KPI Dashboard in Google Sheets. Monitor efficiency, costs, and sustainability.

Additionally, all NEM Solar cost/watt values are represented using AC capacity, and all Energy Storage cost/watt values are represented using Storage Size (kW ...

The PV facility records are collected from the U.S. Energy Information Administration (EIA), position-verified and digitized from aerial imagery, and checked for quality. EIA facility data are supplemented ...
