-----

Estimated small scale solar photovoltaic generation and small scale solar photovoltaic capacity are based on data from Form EIA-861M, Form EIA-861 and from estimation methods ...

The dataset is available in CSV format and includes raw data, processed datasets, and aggregated metrics for two solar power plants. ...

The energy output range is based on analysis of 30 years of historical weather data, and is intended to provide an indication of the possible interannual variability in generation for a Fixed (open rack) PV ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find ...

PV-Live: This dataset provides real-time data on solar energy generation in the United Kingdom. It includes data on the total amount of solar energy generated, ...

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

Lawrence Berkeley National Laboratory (Berkeley Lab) estimates hourly project-level generation data for utility-scale solar projects in the seven organized wholesale markets and 18 additional Balancing Areas.

The following timestamped dataset consists of data at regular intervals of 2-minutes. Each record contains weather conditions such as Air Temperature ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.
