-----

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...

Nearly 250 GWdc of solar will be installed from 2025-2030, but the sector has more potential Despite the changing market and policy conditions that the solar industry has faced this ...

Current, comprehensive coverage of the Solar Power Generation Industry. Includes: industry forecasts, trends, financial information & detailed analysis. Updated 11/24/2025.

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

In 2024, 17 countries, with variable renewable energy (VRE) generation exceeding 25%, introduced intended solutions to mitigate issues related to high curtailment, negative pricing, VRE unprofitability, ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects ...

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates ...

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.
