One of the most promising trends in Central America is the rapid expansion of solar power. Countries like El Salvador and Honduras have made substantial investments in solar energy projects.

The group on February 25 said it will invest in distributed solar power projects across South America, Central America, and the Caribbean.

The study highlights the feasibility and benefits of defossilising the Central American energy system using 100% renewable energy. It provides valuable insights for policymakers and ...

The Dominican Republic has officially inaugurated Cotoperí Solar, the largest PV project in Central America and the Caribbean, in a ceremony led by Vice President Raquel Peña.

Central America, blessed with ample sunshine, has embraced solar energy as a key component of its renewable energy mix. Solar farms and rooftop installations have proliferated ...

Aligned with global trends, the installed solar photovoltaic capacity in Latin America and the Caribbean has greatly increased in the last decade, ...
