This guide is primarily concerned with grounding practices related to personnel protection within SPPs for 50 Hz or 60 Hz systems.

This article covers grounding in PV systems, which differs slightly from standard grounding systems. The concept and purpose of grounding in DC systems, such ...

There should be no separately maintained ground rods or ground systems that are associated with the communications shelter, site, building, or equipment room. Adherence to these requirements ...

The purpose of this Standard is to enable and encourage the planning, design, and installation of generic telecommunications bonding and grounding systems within premises with or without prior ...

A British standard that defines grounding principles for medium-voltage (MV) and high-voltage (HV) installations. It emphasizes equipotential ...

Bonding and grounding all conduits, cable trays, enclosures, cables, protectors, and other conductive infrastructure as per the requirements of the NEC and TIA 607 to main building ground.

Abstract--This paper presents basic guidelines on design considerations for large utility-scale photovoltaic (PV) solar power plant (SPP) substation and collector grounding systems for safety ...

Both volumes (Volume I, Basic Theory and Volume II, Applications) implement the Grounding, Bonding, and Shielding requirements of MIL-STD-188-124A which is mandatory for use within the Department ...

The grounding resistance of a comprehensive communication building should be less than or equal to one ohm. The grounding resistance of an ordinary communication office should be less than five ohms.
