-----

As part of the project, the City of Ljubljana will install solar power plants on the roofs of public buildings, with the aim of contributing to a sustainable future and energy independence for the city.

A DNA-inspired liquid stores solar energy for months, releasing it as heat on demand.

Scientists developed a reusable liquid that captures and stores solar energy as heat, offering a battery-free alternative for heating and more.

Recent research suggests that seasonal solar heat storage, long considered one of the hardest problems in clean energy, may be chemically feasible. A new study, reported by ZME ...

If you can adjust the tilt angle of your solar PV panels, please refer to the seasonal tilt angles below for optimal solar energy production in Ljubljana, Slovenia.

Resalta and Energetika Ljubljana are entering a public-private partnership with the City of Ljubljana for the installation of 5 MW in peak solar ...

To store heat for days, weeks, or months, you need to trap the energy in the bonds of a molecule that can later release heat on demand.

solar systems retail in Ljubljana is transforming Slovenia's energy landscape. Explore market trends, cost-saving opportunities, and professional installation services tailored for residential and ...

As Ljubljana gears up for its solar energy expansion in 2025, the city is set to become a model for urban sustainability. This approach not only aims to reduce carbon emissions but also to stimulate ...
