We have learned a lot of lessons over the years from various shore power projects. Watch videos of our iMSPO prototype and read about how the solution can help ...

ABB is providing shore-to-ship power connection for ferries and cruise ships in Port of Toulon, cutting emissions and noise during port stays.

Flux Lines develops and operates battery barges that make shore power affordable, flexible, and scalable. Our solutions are ready to support the next decade of clean port electrification.

It offers guidance on the safe and efficient delivery and use of shore-based electrical power to ships at a berth, promoting environmental protection and regulatory compliance.

This analysis outlines a floating battery energy storage platform - referred to as the power barge - capable of delivering high-capacity shore power to offshore construction vessels.

Our customised energy supply systems for supplying ships in the port with shore power make it possible to reduce air pollution, noise and vibrations. An ...

Kongsberg shore power is a flexible solution designed to be implemented in conventional power systems as well as complex power systems. It can easily be integrated with our power management ...

The system is supported by specialists providing integrated logistic support, maintaining availability and access to shore power for the customer, helping to reduce carbon and noise emissions from the QE ...
