Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the entire ...

Headquartered in Switzerland, we deliver scalable, site-ready solutions that integrate battery technology, power conversion and intelligent energy ...

With its hydroelectric power plants in the Alps and innovative projects, Switzerland is contributing to the search for solutions for the efficient, long-term storage of electricity. I cover...

With the development of the start-up Green-Y Energy AG and the SBTC, it is possible to store renewable energy and release it as electricity, heat and cold as required.

Swiss-Green Engineering Sàrl est une entreprise basée à Morat, dans le canton de Fribourg. Nous sommes spécialisés dans l'énergie photovoltaïque et les systèmes de stockage d'énergie (BESS). ...

ETH Zurich and EPFL want to work with partners from politics, science and industry to push innovative storage and transport solutions for ...

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the increase ...

CGES is a coalition for green energy and storage in Switzerland, bringing together stakeholders from businesses, associations, academia, and public entities, in ...
