The agreement today for the Tashkent Riverside project reflects the strong trust placed in ACWA Power as the private sector partner, and one of the ...

The project stems from a memorandum of understanding signed in June 2024 between the Tashkent regional administration and Baibuting Group. ...

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024. [pdf]

Located about 30 kilometers northeast of Tashkent, the project includes a newly built 334 MW/500 MWh electrochemical energy storage station, a 220 kV booster station, a 220 kV cable ...

Co-developed by ACWA Power and Uzbekistan's Ministry of Energy under an Independent Power Producer (IPP) framework, the Project features a 334MW/500MWh single-stage ...

Design, construction, installation and earthworks are planned to be carried out in accordance with international standards and the terms of the concluded contracts, which should ...

Upon completion, the project will effectively alleviate power shortages in the Tashkent region, enhance grid stability, increase the share of ...

The project encompasses a 200MW solar photovoltaic (PV) plant and a 500 megawatt hours (MWh) battery energy storage system (BESS), the largest in Central Asia, aimed at bolstering the Uzbek grid.
