The third-party ownership share of U.S. residential PV systems increased sharply in 2024, aided by high interest rates and additional incentives ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

For the 29th consecutive year, the IEA-PVPS Trends report is now available. This document provides the most comprehensive global overview of the development ...

Solar market share can vary considerably depending on whether it is calculated as a percentage of total generation or load (e.g., Vermont). As a percentage of in-state generation, California's solar market ...

At a Glance: Key Takeaways: In 2024, global cumulative PV capacity reached over 2.2 TW, with China alone surpassing 1 TW. At least 554 GW of new PV systems ...

In the EU, utility-scale PV made up 42% of new additions (up 6% from 2023), commercial and industrial PV made up 39% of new additions (up 3% from 2023), and residential PV ...

PV played an important role in the reduction of the CO2 emissions from electricity in 2023, with more than 75% of new renewable capacity installed in 2023, ...

Guidance on designing and operating large-scale solar PV systems. Covers location, design, yield prediction, financing, construction, and maintenance.

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...
