Solergie aims to overcome the lack of energy by installing a nano-grid infrastructure: an energy solution that provides off-grid communities in rural ...

More recently, in April 2025, Togo launched the construction of a 25 MW solar facility in Dapaong (along with battery storage) to serve the northern ...

Discover how Togo's groundbreaking energy storage projects are reshaping West Africa's power infrastructure while addressing renewable energy challenges. This article explores technological ...

The proposed project consists of a 400-megawatt (MW) solar power plant with approximately 698,500 solar photovoltaic modules installed on a single-axis ...

Box type substations are versatile, suitable for various applications including renewable energy projects, construction sites, and industrial facilities. Their modular nature allows for easy relocation and ...

ARISE Integrated Industrial Platforms (ARISE IIP), a pan-African developer and operator of world-class industrial parks has launched a call for tender for the construction of 390 MW/200 ...

As global energy demands rise, projects like the Togo Northwest Wind, Solar and Storage Energy Base are becoming critical. Combining wind, solar, and battery storage, this facility addresses two key ...

It can be widely used in application scenarios such as industrial parks, community business districts, photovoltaic charging stations, and substation energy storage.

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include ...
