-----

ed their renewable energy potential, such as Tunisia. The objective of this report is to look into the potential of Battery Energy Storage System (BESS) development in Tunisia, in line with national ...

As one of the most climate vulnerable Mediterranean countries, Tunisia's electrical system is expecting increased demand resulting from expanding peak-hour demand patterns, intensifying cooling needs ...

Société Tunisienne de l'Electricité et du Gaz (STEG) is planning to secure a loan of EUR 40 million from the European Bank for Reconstruction and Development (EBRD) to support a new solar ...

Though hydrocarbon-based generation will continue to dominate Tunisia's overall energy picture in the near term, the potential for growth in wind and solar power generation is significant.

Aligned with the Government's updated Energy Transition Strategy, TEREK aims to strengthen STEG's operational and financial performance, attract private investment, and lower the ...

Tunisia's energy storage power generation sector is transforming faster than a desert sunset. With solar irradiation levels hitting 5.3 kWh/m<sup>2</sup>/day and wind speeds reaching 9 m/s in coastal areas, this North ...

This article explores how battery storage, pumped hydro, and innovative technologies can transform Tunisia's power infrastructure while addressing challenges like solar intermittency and peak demand ...

The European Bank for Reconstruction and Development (EBRD) is considering lending up to EUR 40 million (USD 47.3m) for a 50-MW solar project with a 20-MWh battery storage component ...
