In June 2023, the World Bank approved US\$268.4 million in financing for the Tunisia-Italy interconnector (ELMED) project that will link ...

solar PV and wind together accounting for nearly 70%. The integration of these variable energy sources into national energy grids will largely depend on storage technologies, and among them especially ...

This article explores how battery storage, pumped hydro, and innovative technologies can transform Tunisia's power infrastructure while addressing challenges like solar intermittency and peak demand ...

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in ...

This paper reviews the prospects of one of the major renewable energy sources in the country: wind energy. It presents the state of wind energy sector in the world and tracks in particular, ...

Abstract meteorological stations to the electricity consumption in a timeline fashion. The idea is to evaluate the wind potential for a few locations around Tunisia using Weibull distribution and ...

TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for ...

Tunisia's energy storage power generation sector is transforming faster than a desert sunset. With solar irradiation levels hitting 5.3 kWh/m²/day and wind speeds reaching 9 m/s in coastal areas, this North ...

The European Bank for Reconstruction and Development (EBRD) is considering lending up to EUR 40 million (USD 47.3m) for a 50-MW solar project with a 20-MWh battery storage component ...
