The team builds solar power plants across Ukraine -- from Dnipropetrovsk to Odesa and Mykolaiv regions. The Zakarpattia project will become one of the largest in the company's portfolio and a key ...

Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

Wait, no - that last point actually works in Ukraine's favor. With conventional power plants becoming strategic liabilities, distributed energy storage systems paired with solar offer both resilience and ...

Energy storage facilities are used to balance or manage overloads, buy and/or sell electricity on the electricity market. STEM SOLAR is developing energy storage ...

In 2021, KNESS entered the Polish market, and in 2023 it launched KNESS Baltic and began EPC-based solar power plant construction in Latvia. Within this segment, three solar plants ...

A report by the International Energy Agency (IEA) recommends three strategies to accelerate the deployment of distributed solar and battery energy ...

Ukraine's solar conditions, like many in northern Europe, are only moderate, yet solar generation combined with battery storage has helped maintain power during outages, demonstrating ...

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

Over 40% of Ukraine's pre-2022 RES in solar PV and wind power currently lies in occupied territory. Wind generation capacity, once concentrated in the now occupied regions of ...
