-----

Using an optimization algorithm, we calculate the net lifetime income of a major industrial user and optimize the capacity allocation for user-side energy storage in the Nanjing energy storage service ...

This paper proposes an integrated decisionmaking model based on two-layer programming for the collaborative optimization of capacity configuration and operation strategy of user side energy ...

To address these challenges, this study proposes a user-side cloud energy storage (CES) model with active participation of the operator. This CES model incorporates adjustable time-of-use (TOU) ...

With policies such as Document No. 136 promoting the marketization of new energy, the business model of user-side energy storage is expanding from simple peak-valley arbitrage to ...

In order to better utilize user side energy storage to improve the reliability of power grid operation, this article develops a new type of user side energy storage intelligent operation system.

In this study, the author introduced the concept of cloud energy storage and proposed a system architecture and operational model based on the deployment characteristics of user-side energy ...

In this study, a multi-time scale optimal configuration approach for user-side energy storage is introduced, which takes into account demand perception.

Businesses are caught between rocketing operational costs and climate commitments. But what if there's a solution that cuts energy expenses while future-proofing operations?

Then, considering the load characteristics and bidirectional energy interaction of different nodes, a user-side decentralized energy storage configuration model is developed for a multi ...
