Sandia and NASA have collaborated in developing and evaluating resilient DC microgrids for a long-term lunar base composed of power electronic-based interconnections of multiple DC microgrids.

Operator Information: Ameresco was selected -- through a competitive bid process -- to design, develop, own, and operate the microgrid. Ameresco is an industry ...

While the Sycamore & Oak solar installation and grid build-out is complete, GRID will keep working in southeast DC as several other buildings on the campus are slated for deconstruction and ...

Abstract This article presents a state-of-the-art review of the status, development, and prospects of DC-based microgrids.

Microgrid operation was validated in a power hardware-in-the-loop experiment using a programmable DC power supply to emulate the battery and a grid simulator to emulate the Guam ...

Many microgrid developers balk at Washington, D.C.'s proposed ruling allowing microgrids to compete directly with Potomac Electric Power (Pepco). But one ...

DC microgrids are already becoming popular, so modern research is converging on various aspects of these systems. This article explores burning issues in DC microgrids, including ...

Develop a framework for dynamic formation of networked microgrids for optimized operations under both normal and emergency conditions. This project.

As the community at St. Elizabeths East grows with housing, health care, and entertainment, new microgrid will ensure greater reliability while prioritizing clean energy. ...
